

Task Summary in this phase

Apple Sign up Validation:

- 1) Social Sign up
 - a) **iOS:** Apple sign up has been implemented. But that does not allow user to sign up completely needs addressing. Full iOS sign up to work. DigiPartner App and Digibarber App
 - b) **Android & iOS:** Gmail sign up has been implemented. Validation needs fixing. Sign up testing and needs to work. DigiPartner App and Digibarber App
- 2) Pull down flash notification Banner
 - a) **Android & iOS:** Pull down banner refreshing not displaying when you go onto page. Page has to actively re-load to display image.
- 3) Wallet Screen Update:
 - a) **Android & iOS & Backend:** Current balance of what is available before payout. Currently payout is set to each day. So this is all the bookings (total) before payout
 - b) **Android & iOS & Backend:** Each Wallet Screen Page should display the correct information. Currently incorrect information is being sent in some of the columns
- 4) Update "sharing user page"..
 - a) **Android & iOS:** Users are able to share there profile pages (barbers) via deep linking. Process needs testing and fixing. When a users page is shared a booking is needed to be made without any hassle. **Firestore dynamic linking to be implemented. BOTH DIGIPARTNER AND DIGIBARBER APP.**
- 5) Updating Service page:
 - a) **iOS:** Updating services takes you to updating opening times page afterwards. This is incorrect should save information and take user back to menu. Check Android app for clarification. DIGIPARTNER APP
- 6) Gallery Image Pages
 - a) **iOS:** When amending Gallery images on iOS the bottom camera and image slider is too big! needs to be reduced in size.
- 7) Compliance with apple
 - a) **iOS:** Replace UIWebView to WebKit view, for Apple compliance

8) Updating opening times:

a) **Android**: When 00:15 is selected here - it reads as 12:15 in the afternoon.

9) Previous Booking Tab:

a) **Android & iOS**: App crashing when book again is selected.

b) **Android & iOS**: Transaction ID is incorrect here and in a few places with the app

10) Profile page

a) **iOS**: A few small design issues need rectifying and matching invasion. Correct constraints to be used.

11) Firebase implementation

a) **Android & iOS**: Crashanalytics needs checking. Should already be updated in all the frontend if needed.

****Backend to support in adjusting backend information if required****

BACKEND ONLY TASKS

12) Implement promocode functionality & Cancellation improvement

13) Remove user balance from backend

14) Automated Email updating to display correct information:

- a. Can we add a NEW line here with Booking fee and add the totals. 2. In all emails and frontend applications can we only display the first 8 characters of the Booking ID for easier referencing.
- b. Change "Wallet Credit" to "Booking fee" and add all the values. Text under "We got you" amend to "We have processed your refund. We'll return the payment to the account used to place the order in 5-10 working days.

15) Auto populate DOB here please. Frontend to send information

16) Re-word in app notifications

17) Early completed bookings (Times) should go back into the available slots if a barber completes a booking early.

18) Early completed bookings (Times) should go back into the available slots if a barber completes a booking early.

Minimum requirement in this phase is to be able to book a barber successfully and complete a booking. Cancel a booking. Reschedule a booking. All functions already working but MUST continue to work.
